Conran chooses Lonsdale airtight patent glazing

A world class design team, Jasper Conran Limited moved into refurbished premises in South London two years ago. The converted mews property allowed scope for large open spaces so architects Conran and Partners wanted to make the most use of natural daylight, a major consideration in a design studio.

Standardised roof windows currently on the market just did not meet the specification requirements. The new skylights had to be 3 x 2 metres with slim sight-lines and most importantly, be contemporary in appearance.

Installed by Ashburn Glass and Glazing Limited, the seven Lonsdale skylights manufactured from the company's SpanGard thermally broken patent glazing system provided a cost effective and aesthetically pleasing solution to what was an exacting bespoke project.

Happily, Conran have since reported no problems with the installation and are delighted with the additional light afforded by the skylights. What better endorsement could there be for a glazing project under the scrutiny of a top design team!

Richard Burgess, Lonsdale's Sales Director comments, "Lonsdale are now able to offer glazing systems that meet air-tightness and thermal requirements of the latest Building Regulations. Energy conservation is the future; we are fully committed to assist the construction industry's aim to achieve energy efficient buildings. To support this aim, we offer free technical advice, certificates of performance, data sheets and CAD drawing detailing as projects progress, ensuring architects and contractors involved have the information they need when they need it."

In addition to the air-tight range, Lonsdale still offer patent glazing systems suitable for "outside" applications such as door canopies, station platforms, and walkways.

Readers wanting to discover more about air-tight patent glazing should ask for Lonsdale's free publication dealing with the most frequently asked questions about this topical issue on 020 8801 4221 or visit their website www.patentglazing.co.uk
